

ABSTRACT OF THE DISCLOSURE

A horizontal portable miter panel saw system that is capable of utilizing a wide range of power hand tools and processing plywood panels and other oversized materials. The apparatus is
5 designed to provide safety, accuracy, mobility, capacity, ease of use, and affordability. Four extendable multi-adjustable legs allow the table to be leveled on almost any surface. An adjustable guide control unit is movable in the x, y, and z planes via a chain drive trolley that allows a tool make any type of cut accurately and without the need for complex measurements. A plurality of tabletop members form the table top, these are extendable and adjustable to allow
10 for plywood panels to be supported by the table.
